Port of Richmond deploys Radwin video surveillance network

Thursday 15 August 2013 | 19:12 CET | News

Global provider of broadband wireless services, Radwin has announced that the Port of Richmond in Virginia deployed its wireless surveillance network to enhance security throughout its 121-acre port facility. Radwin partnered with system integration firm CelPlan to design and implement the wireless surveillance network. Radwin 5000 and Radwin 2000 wireless systems deliver the highest capacity for long ranges and provide the service level required for high definition video transmissions.
